

**AGENDA**  
**PROFESSIONAL EDUCATION COUNCIL**  
**2:00 - Wednesday, June 10, 2009**  
**Tate Page Hall 334**

- I. Consideration of the Minutes from the May 13, 2009 meeting (Minutes can be found on the CEBS Main Web Page—click on Faculty & Staff and then Meeting Minutes and Agendas)
  
- II. New Business
  - A. COLLEGE OF EDUCATION AND BEHAVIORAL SCIENCES**  
**Office of Teacher Services**
    - 1. Presentation of Candidates Completing Requirements for Admission to the Professional Education Unit May 13, 2009 to June 10, 2009
  
  - B. OGDEN COLLEGE OF SCIENCE AND ENGINEERING**  
**Department of Mathematics and Computer Science**
    - 1. Multiple Revisions to a Course – Math 126, Calculus and Analytic Geometry I
    - 2. Multiple Revisions to a Course – Math 227, Calculus and Analytic Geometry II
  
  - C. COLLEGE OF EDUCATION AND BEHAVIORAL SCIENCES**  
**Department of Curriculum and Instruction**
    - 1. Create a New Course – EDU 491, Practicum for Teacher Candidates
    - 2. Revise a Program – 579, Middle Grades Education
  
  - D. COLLEGE OF EDUCATION AND BEHAVIORAL SCIENCES**  
**Office of the Dean**
    - 1. Teacher Leader Masters and Planned Fifth Year Program Framework – Second Reading
  
- III. Other Business

**CANDIDATES COMPLETING REQUIREMENTS FOR ADMISSIONS  
TO PROFESSIONAL EDUCATION UNIT**

**May 13, 2009 – June 10, 2009**

**Elementary P-5**

Brown, Emily  
Carey, Kris  
Daugherty, Britney  
Edison, Chelce  
Green, Margaret  
Hatcher, Keiliah  
Hicks, Ashley  
Jessee, Brittany  
Smith, Autumn  
Taylor, Stephanie  
Vincent, Sharon  
White, Amanda  
White, Diane

**Middle Grades**

Anglea, James	English/SS
Locke, Suesan	English/SS
Patrick, LaDonna	English/SS
Travis, Ginger	Math
White, Brittney	English/SS
Wilson, Amanda	English/Math
Young, Amber	Math/SS

**5-12**

Williams, Marideth      Business and Marketing.

**P-12**

**Secondary**

Bernhardt, Jonathan	Social Studies
Casebier, Byron	English
Decker, Michael	Social Studies
Groce, Cassandra	English
Martin, Blake	Math
Martin, Christopher	Social Studies
Sherlock, Brenda	Math
Strode, Alex	Social Studies

**IECE**

**Masters**

Brocato, Ashley	LBD
Deaton, Tracy	LBD
Hendley, Shevawn	LBD
Long, April	LBD
Noffsinger, Debra	LBD
Stephens, Lindsay	LBD

**Special Circumstance Masters**

If there are any questions or concerns about the status of any candidate, the person with the question or concern should contact Dr. Fred Carter, Teacher Services (745-4611 or [fred.carter@wku.edu](mailto:fred.carter@wku.edu)) prior to the PEC meeting.

Proposal Date: April 8, 2009

**Ogden College of Science and Engineering  
Department of Mathematics and Computer Science  
Proposal to Make Multiple Revisions to a Course  
(Action Item)**

Contact Person: Dr. Ferhan Atici     [ferhan.atici@wku.edu](mailto:ferhan.atici@wku.edu)     745-6229

**1. Identification of course:**

- 1.1 Current course prefix and number: MATH 126
- 1.2 Course title: Calculus and Analytic Geometry I
- 1.3 Credit hours: 4.5

**2. Revise course title:**

- 2.1 Current course title: Calculus and Analytic Geometry I
- 2.2 Proposed course title: Calculus I
- 2.3 Proposed abbreviated title: Calculus I
- 2.4 Rationale for revision of course title: The proposed title for the first course in calculus conforms with the title used at many other major institutions.

**3. Revise course number:**

- 3.1 Current course number: MATH 126
- 3.2 Proposed course number: MATH 136
- 3.3 Rationale for revision of course number: The department is adopting a numbering system for its courses in which the tens digit indicates the specific mathematical area of the course. The numbers 30-39 will be for calculus courses.

**4. Revise course prerequisites/corequisites/special requirements:**

- 4.1 Current prerequisites: Four years of high school mathematics, including Algebra II, geometry, and trigonometry, and satisfactory score on Math Placement Exam; or MATH 117 or MATH 118, with grade of C or better.
- 4.2 Proposed prerequisites: Four years of high school mathematics, including Algebra II, geometry, and trigonometry, and satisfactory scores on Math Placement Exam and Math Placement Trig Exam; or MATH 117 or MATH 118, with grade of C or better.
- 4.3 Rationale for revision of course prerequisites: Skill in trigonometry is necessary for success in calculus. Students who cannot demonstrate such skill through a satisfactory score on the MPTE would benefit from enrolling in MATH 117 prior to studying calculus.
- 4.4 Effect on completion of major/minor sequence: None. Students who do not have the required skills in trigonometry are often required to repeat the first calculus course.

**5. Revise course catalog listing:**

5.1 Current course catalog listing:

This is the first of a sequence of courses which present a unified treatment of plane and solid analytic geometry and differential and integral calculus. (Graphing calculator required.)

5.2 Proposed course catalog listing:

A course in one-variable calculus including topics from analytic geometry. Limits, derivatives, integration, and applications of polynomial, rational, trigonometric, and transcendental functions. Includes lecture and recitation. (Graphing calculator required.)

5.3 Rationale for revision of course catalog listing: The proposed listing describes the content and emphasis of the course in greater detail. The department also will deliver the course on a lecture//recitation schedule similar to that of many other institutions.

**6. Revise course credit hours:**

6.1 Current course credit hours: 4.5

6.2 Proposed course credit hours: 4

6.3 Rationale for revision of course credit hours: The change to 4 hours will make the course conform with Calculus I courses at most other major institutions and eliminate problems for students who wish to transfer calculus credit to or from WKU.

**7. Proposed term for implementation: Fall 2010**

**8. Dates of prior committee approvals:**

Mathematics and Computer Science  
Department

04/10/2009

Proposal Date: April 8, 2009

**Ogden College of Science and Engineering  
Department of Mathematics and Computer Science  
Proposal to Make Multiple Revisions to a Course  
(Action Item)**

Contact Person: Dr. Ferhan Atici     [ferhan.atici@wku.edu](mailto:ferhan.atici@wku.edu)     745-6229

**1. Identification of course:**

- 1.1 Current course prefix and number: MATH 227
- 1.2 Course title: Calculus and Analytic Geometry II
- 1.3 Credit hours: 4.5

**2. Revise course title:**

- 2.1 Current course title: Calculus and Analytic Geometry II
- 2.2 Proposed course title: Calculus II
- 2.3 Proposed abbreviated title: Calculus II
- 2.4 Rationale for revision of course title: The proposed title for the second course in the calculus sequence conforms with that used at many other major institutions.

**3. Revise course number:**

- 3.1 Current course number: MATH 227
- 3.2 Proposed course number: MATH 137
- 3.3 Rationale for revision of course number: The department is adopting a numbering system for its courses in which the tens digit indicates the specific mathematical area of the course. The numbers 30-39 will be for calculus courses. Because the second course in the calculus sequence is usually offered as a freshman-level course, the number will be changed to the 100-level without changing the course content.

**4. Revise course prerequisites:**

- 4.1 Current prerequisites: MATH 126 with a grade of C or better
- 4.2 Proposed prerequisites: MATH 136 with a grade of C or better
- 4.3 Rationale for revision of course prerequisites: The course number for MATH 126 has been changed to MATH 136.

**5. Revise course catalog listing:**

- 5.1 Current course catalog listing:

The continuation of MATH 126.

5.2 Proposed course catalog listing:

A second course in one-variable calculus including topics from analytic geometry. Methods of integration, sequences and series, polar and parametric functions. Includes lecture and recitation.

5.3 Rationale for revision of course catalog listing: The proposed listing describes the content and emphasis of the course in more detail. The department also will deliver the course on a lecture//recitation schedule similar to that used by many other institutions.

**6. Revise course credit hours:**

6.1 Current course credit hours: 4.5

6.2 Proposed course credit hours: 4

6.3 Rationale for revision of course credit hours: The change to 4 hours will make the course conform with Calculus II courses at most other major institutions and eliminate problems for students who wish to transfer calculus credit to or from WKU.

Proposal Date: 04/15/2009

**College of Education and Behavioral Sciences  
Department of Curriculum & Instruction  
Proposal to Create a New Course  
(Action Item)**

Contact Person: Kay Gandy, [kay.gandy@wku.edu](mailto:kay.gandy@wku.edu), 5-2991

**1. Identification of proposed course:**

- 1.1 Course prefix (subject area) and number: EDU 491
- 1.2 Course title: Practicum for Teacher Candidates
- 1.3 Abbreviated course title: Practicum for Teacher Candidates
- 1.4 Credit hours and contact hours: 1 hour
- 1.5 Type of course: (P) Supervised Practical Experience
- 1.6 Prerequisites: instructor permission
- 1.7 Course catalog listing: Development of knowledge and skills required of teacher candidates. Grading is pass/fail. Students must take EDU 491 in the term (Winter or May) immediately following the student teaching semester and EDU 489.

**2. Rationale:**

- 2.1 Reason for developing the proposed course: The Professional Education Council plan for matriculation of teacher candidates includes a requirement that students must earn a C or higher grade in EDU 489 with a holistic score of 2+ on the Teacher Work sample (TWS). The TWS is the capstone senior project for education majors. As yet there is no remediation plan in effect for teacher candidates who do not meet these requirements. This remedial course is designed for undergraduate students in education leading to initial certification. Presently no such course exists in this undergraduate program. This course is designed for students who score below a Level 2 on the Teacher Work Sample (TWS), who have extenuating circumstances preventing the completion of the TWS, who have extensive absences, or who have earned below a C average for EDU 489. Students who meet any of these criteria will receive a grade of X (incomplete) in EDU 489, pending satisfactory completion of the proposed EDU 491. Students who receive a passing grade in EDU 491 will receive in EDU 489 a grade of B or C, depending on the quality of work with the Teacher Work Sample. Students who do not pass EDU 491 will receive a grade of D in EDU 489 and will be required to repeat it.
- 2.2 Projected enrollment in the proposed course: It is estimated that two to five students will be required to enroll in this course during either the

winter or May terms. At least two students each semester have not scored at the passing criterion on the TWS; however, up till now there has been no remediation plan in effect.

- 2.3 Relationship of the proposed course to courses now offered by the department: This course is directly related to EDU 489 Student Teaching Seminar. If students do not successfully complete their senior capstone project (TWS), then they will be required to take the proposed course. Students will be given a completely different school setting than the student teaching setting and must write a new TWS. The proposed course will meet the objectives of the Professional Education Council that teacher candidates complete satisfactory TWS projects as a condition for program completion and eligibility for a recommendation for teacher certification.
- 2.4 Relationship of the proposed course to courses offered in other departments: The proposed course is similar in intent to other courses designed to address skills deficits, facilitate program completion, and help students succeed academically. For example, “enhanced” sections of ENG 100 and MATH 116 have been developed to provide additional instruction for students identified as needing that additional instruction. However, there are several differences between the proposed course and the enhanced sections of ENG 100 and MATH 116. First, the proposed course provides remedial assistance for students at the end of their academic program rather than at the beginning. Second, although students who need the enhanced mathematics and English courses are identified prior to enrollment in those courses, students in EDU 491 will be identified at the completion of EDU 489 and the student teaching experience. The students will take EDU 491 following EDU 489, rather than concurrently. Third, students in EDU 491 will receive one hour of credit, which is not available to students in ENG 100 and MATH 116. However, the additional credit is justified by the fact that EDU 491 students will have to prepare new Teacher Work Samples (a significant amount of work) based on field experiences in different settings from their student teaching settings. Finally, EDU 491 is designed to be offered only in the three-week terms (Winter and May) following the fall and spring semesters when student teaching occurs. This design will allow students the opportunity to do remediation immediately and thus possibly complete requirements for graduation.
- 2.5 Relationship of the proposed course to courses offered in other institutions: Other universities that use the Teacher Work Sample as a senior capstone project were contacted about remediation plans for students who score holistically below a Level 2.  
California State University: Students must score a Level 2 in each of the seven sections of the TWS and redo each section that does not meet that level.

University of Northern Iowa: Student must write an entirely new TWS the second eight weeks of student teaching if they score below a Level 2.

Idaho State: Student must repeat a minimum of an 8 week block of student-teaching and score a level 2+.

Of the other partners in the Renaissance Project, although each required a Level 2+ score on the TWS, none responded with a formal plan in effect for remediation.

### **3. Discussion of proposed course:**

#### 3.1 Course objectives:

To develop student abilities to use communication skills, apply core concepts, become self-sufficient individuals, become responsible team members, think and solve problems, integrate knowledge and improve personal teaching skills, the candidate will:

- ◆ Design/plan viable instruction and learning climates
- ◆ Create a dynamic learning climate
- ◆ Introduce/implement/manage efficient instruction
- ◆ Assess learning and communicate results to students and others
- ◆ Reflect on and evaluate specific teaching/learning situations and or programs
- ◆ Collaborate with colleagues and others to design, implement, and support learning programs
- ◆ Evaluate his/her own performance with respect to modeling and teaching Kentucky's learning goals and implements a personal professional growth plan
- ◆ Demonstrate a current and sufficient knowledge of certified content areas
- ◆ Use technology to support instruction, access and manage data, enhance professional growth and productivity, communicate with colleagues and others, and conduct research

#### 3.2 Content outline:

This course will include content from the Teacher Work Sample, including, Assessment Plan, Contextual Factors, Design for Instruction, Learning Goals, Instructional Decision Making, Analysis of Student Learning, Reflection and Evaluation

3.3 Student expectations and requirements: Student will be placed in a new school setting and will be required to collect data relevant to that setting. Students will be expected to have a minimum of 100 field hours. Student will successfully complete a Teacher Work Sample by scoring a Level 2+.

3.4 Tentative texts and course materials: none

### **4. Resources:**

- 4.1 Library resources: none required beyond what is required for EDU 489.
- 4.2 Computer resources: none required beyond what is required for EDU 489.

**5. Budget implications:**

- 5.1 Proposed method of staffing: The course will be taught by faculty in the Department of Curriculum and Instruction. Students will be expected to pay a \$100 fee to compensate their supervising classroom teachers.
- 5.2 Special equipment needed: none
- 5.3 Expendable materials needed: none
- 5.4 Laboratory materials needed: none

**6. Proposed term for implementation: Winter 2010**

**7. Dates of prior committee approvals:**

Proposal to Revise A Program  
(Action Item)**

Contact Person: Dr. Tabitha Daniel, [tabitha.daniel@wku.edu](mailto:tabitha.daniel@wku.edu), 745-2615

**1. Identification of program:**

- 1.1 Current program reference number: 579
- 1.2 Current program title: Middle Grades Education
- 1.3 Credit hours: 76-81

**2. Identification of the proposed program changes:**

- Allow students to take LTCY 444 Reading in the Secondary School as an alternative to LYCY 421 Reading in the Middle Grades.
- Delete Mathematics and Science Content Areas from the Middle Grades Program.

**3. Detailed program description:**

Current Program	Revised Program
<p>The middle grades education program (reference number 579) leads to the Bachelor of Science degree and the Kentucky Middle Grades Education (grades 5-9) certificate. The program requires 44 semester hours of general education that should include a biological science course and a physical science course; 37-40 semester hours of professional education courses (MGE 275, PSY 310, EXED 330, PSY 421/422 and LTCY 421, MGE 385, 490, EDU 489, one or two courses selected from MGE 475-481, and a computer literacy course which must be CS 145, CIS 141, or LME 448) and 24-27 hours in each of two teaching fields selected from English/communications, mathematics, science or social studies. Students may choose a single concentrated area of emphasis</p>	<p>The middle grades education program (reference number 579) leads to the Bachelor of Science degree and the Kentucky Middle Grades Education (grades 5-9) certificate for teaching English/communications and social studies. **4. Rationale for the proposed program change:**

- Faculty reviewed the content of LTCY 421- Reading in the Middle Grades and LTCY 444 Reading in the Secondary School and determined both are appropriate courses to fill the criteria.
- WKU has received a grant from Exxon/Mobile Foundation through the Mathematics Science Initiative to improve preparation of middle school and secondary mathematics and science teachers. The grant requires replication of a very successful program at the University of Texas, Austin. At WKU the Science

Mathematics Education major (SKyTeach) has been approved and students will earn a double major in science or math and education.

**5. Proposed term for implementation and special provisions (if applicable):** Fall 2009

**6. Dates of prior committee approvals:**

Department of Curriculum & Instruction:	<u>  5/27/2009  </u>
CEBS Curriculum Committee	<u>  6/2/2009  </u>
Professional Education Council	_____
Undergraduate Curriculum Committee	_____
University Senate	_____

**Attachment: Program Inventory Form**

## 1                   **TEACHER LEADER MASTER’S AND PLANNED FIFTH-YEAR PROGRAM FRAMEWORK**

2   Western Kentucky University (WKU) has developed a Teacher Leader Master’s and Planned Fifth-Year  
3   Program in accordance with the 2000 guidelines set out by the Kentucky Education Professional  
4   Standards Board (EPSB) leading to Kentucky certification rank change. Through this program, WKU is  
5   striving to close the gap between teacher preparation and teaching practice that directly impacts  
6   student learning.

7   The standards-based education reform movement has been an important and difficult paradigm shift for  
8   the K-12 population of educators (Pankratz & Petrosko, 2000). The research work of the universities is  
9   necessary to inform the work of practitioners (Grossman, 2008), as the theoretical foundation is crucial  
10   to the program. The integration of the research, along with sound pedagogical insights and outcome  
11   measures on how teachers make a difference and impact student learning, is an essential next step  
12   (Grossman, 2008; Wise, Ehrenberg, & Leibbrand, 2008). The transition from the world of theoretical  
13   knowledge to the translation of real-world classroom instruction often becomes disjointed. Connecting  
14   the dots between theory and practice is not an easy task for most novice and not-so-novice teachers.  
15   Therefore, in order to provide the necessary services for clientele, WKU has a responsibility and a  
16   commitment to its graduates to provide the resources and support needed to move them up the  
17   professional continuum to high quality, accomplished teaching practices.

18   The need to develop teachers as leaders is an essential component to improving the program at WKU.  
19   Teacher Leadership is not necessarily a formal role, responsibility, or set of tasks. Rather, it is a form of  
20   activity in which teachers are empowered to lead efforts and build grassroots capacity to directly impact  
21   the quality of teaching and learning. Teacher Leaders lead within and beyond the classroom through  
22   four core obligations upon which this program is conceived:

23   One: Teacher Leadership is grounded in knowledge of learners and subject matter.

24   WKU is committed to fostering teaching expertise through knowledge of content learners and how  
25   concepts are acquired. Exemplary teaching is the foundation of teacher leadership (Snell & Swanson,  
26   2000, p.10). Therefore, this commitment involves the construction and implementation of curriculum  
27   that is based on a thoughtful understanding of teaching, learning, and the real work of schools.

28  
29   Two: Teacher Leadership is a professional commitment.

30   WKU is committed to providing leadership to advance high-quality teaching and learning, to close  
31   performance gaps among diverse students, and to raise public awareness of the teacher’s critical role as  
32   a professional in designing curriculum and promoting student achievement. It is recognized that teacher  
33   leadership is “required if there is to be any lasting and meaningful change in teaching and learning”  
34   (Dole, 2000, p 12) and any substantial alignment of the key pedagogical and curricular elements of  
35   schooling (Crowther et al., 2002) to impact the learning of ALL students. The goal is to develop the  
36   potential in ALL teachers to be professionals, make decisions and choices in their classrooms, and  
37   ultimately have ownership of their teaching and the types of engagements they have with their  
38   students.

39

40 Three: Teacher Leadership is collaborative and inclusive.

41 WKU is committed to recognizing the value of the collaborative role that includes all stakeholders in the  
42 educational organizations and to providing experiences related to emerging models of teams or  
43 communities of practice. It is recognized that “the realities of working collaboratively with others,  
44 especially in large groups with varied participants, require dramatically different skills” (Killion, 1996, p.  
45 71) than those employed in working with students in classrooms. Teachers need to walk in both the  
46 world of children and the world of schools as organizations. (Silva et al., 2000, p. 800).

47

48 Four: Teacher Leadership is transformative.

49 WKU realizes teacher leadership is paramount for classroom and school improvement. Teacher Leaders  
50 are the strongest link for transforming teaching practices (Doyle, 2000, p.4); for improving professional  
51 practice (Stone et al., 1997, p. 58); and for the improvement of student achievement (McKeever, 2003,  
52 p.84).

53

54 Given these principles, and in accordance with the Education Professional Standards Board (EPSB)  
55 Teacher Leader Master’s and Planned Fifth-Year Program guidelines (2008), the following framework  
56 has been developed collaboratively with GRREC and Region 2 administrators and teachers, Potter  
57 College of Arts and Letters faculty, Ogden College of Science and Engineering faculty, and College of  
58 Education and Behavioral Sciences faculty. Meetings were held at WKU with teachers, district- and  
59 school-based administrators, and faculty from the College of Education and Behavioral Sciences and the  
60 Arts and Sciences colleges. During these meetings, the goal of partnerships was presented and small  
61 focus groups led by university instructors were conducted to solicit the needs of all stakeholders with  
62 regard to teacher preparation, continuing education, and job-embedded professional development.  
63 Along with these large group meetings, additional focus group meetings were held with stakeholders  
64 and college staff on specific topics including assessment issues, interpretation of standards, new course  
65 development, and professional development needs. The dean of the College of Education and  
66 Behavioral Sciences, along with one or two university faculty, visited numerous (Refer to Timeline  
67 Document) school superintendents and instructional supervisors to solicit support in a university-district  
68 partnership. These new levels of relationships forged between districts, the university, and P-12  
69 teachers are leading to shared and collegial leadership where all can grow professionally and learn to  
70 view themselves on the same team with the same goal: “To positively impact student learning through  
71 better schools” (Hoerr, 2005). (Reference Progress Report) **NCATE Standard 3, Element 1; NCATE Standard 5, Elements**  
72 **1, 2, & 5**

73 The program (see Overall Design, Diagram 1) is designed to measure candidates’ levels of proficiency  
74 using the Kentucky Teacher Standards. It is intended to take candidates from the level of initial  
75 proficiency, based on the impact they have on student learning at the time they enter the program, and  
76 move them to advanced levels of teacher proficiency in teaching and learning; partnering with families  
77 and community stakeholders; and as leader/collaborators within their own classroom,  
78 team/department, across the school, and beyond the school (see Framework for Teacher Leadership  
79 Diagram 5, Danielson, C., 2006). **NCATE Standard 1**

80 The program is divided into two instructional levels. Level 1 provides pedagogy, leadership, and content  
81 applicable to all P-12 teachers working in the wide gamut of developmental levels and content areas.  
82 The approach is an integrated core of concomitant skills focused on designing and implementing  
83 instruction that prepares the candidate to impact student learning through classroom research and  
84 leadership. Level 2 is global and directs the Teacher Leader Master's Degree or Planned Non-Degree  
85 Fifth-Year Program candidate into an individual program in content, pedagogy, and/or areas of  
86 professional growth concurrent with the goals of each candidate (refer to Coursework Model). An  
87 Action Research Project focusing on a classroom, school, or district issue is the capstone for the  
88 completion of the Teacher Leader Master's Degree or Planned Non-Degree Fifth-Year Program.

89 The program requires a three-fold assessment protocol (see Assessment Protocols) that transitions  
90 candidates from one level to the next and is administered at strategic times to ensure its  
91 appropriateness and that it guides the professional growth of all candidates. The protocol begins with  
92 an Entry Assessment to determine the course of study and time duration for each concomitant skill  
93 addressed in Level 1. Critical Performance Assessments on the candidate's ability to develop and  
94 implement standards-based units of study, impact student learning through classroom instruction,  
95 assessment and analysis of student achievement, content knowledge, and professional growth,  
96 collaboration and leadership are administered and scored by the faculty throughout the coursework and  
97 uploaded to the Electronic Portfolio System (EPS). A monitoring system, Response to Intervention (RTI),  
98 also will be employed to assure that candidates not reaching full potential in coursework and  
99 assessment protocols are provided services in a timely manner.

100 At the end of the coursework, the assessment performances will be reviewed and assessed holistically  
101 by faculty members and practitioners. This assessment will determine if the candidate is proficient in the  
102 skills addressed in Level 1 and whether the candidate needs additional work in Level 1 topics and/or the  
103 course of study appropriate in Level 2. It provides feedback that allows the candidate and advisor(s) to  
104 alter the program of studies, if needed. Assessments in Level 2 are administered and scored by the  
105 faculty throughout the coursework and uploaded to the Electronic Portfolio System (EPS) as  
106 appropriate. At the end of Level 2, candidates will present a capstone Action Research Project.

## 107 **Admission**

### 108 **Graduate Admissions Criteria**

109 *WKU Graduate: Automatic admission*

110 Currently holds Kentucky teacher certification

111

112 *Graduate of a KY higher education institution other than WKU:*

113 GPA of 2.75 or higher or a qualifying GAP score

114 Currently holds Kentucky teacher certification

115 Submit a standards-based unit of study (for example, a Teacher Work Sample) or KTIP portfolio for  
116 admission credentials review.

117

118 *Graduate of an out-of-state institution of higher education:*

119 GPA of 2.75 or higher or a qualifying GAP score  
120 Kentucky or certification from another state(s)  
121 Submit a standards-based unit sample (for example, a Teacher Work Sample)

122  
123 **Entry Assessment Module** (1 hour). Required. Prerequisite for Level 1 courses.

124 Rationale: This course has been developed to provide an orientation and entry level gate for candidates  
125 admitted to the Teacher Leader Master's programs at WKU. The purpose of the course is to facilitate  
126 intensive self-reflection and self-evaluation, with direction from faculty, to determine strengths,  
127 weaknesses, and areas for study for each candidate within the program. In order to assure that each  
128 candidate's needs are met, a series of assessment evaluation tools and supporting evidence will be used  
129 to determine the candidate's level of proficiency at admission in each concomitant skill addressed in the  
130 program's framework. The candidate will prepare, with the aid of a faculty advisor(s), the course of  
131 instruction needed to reach proficiency in these skills. An individualized plan of study will be developed.  
132 Therefore, the number of hours will vary according to the proficiency level and needs of the candidate.  
133 The duration of the Entry Assessment Course will be individualized based upon the submission and  
134 evaluation of required documents.

135 Content and documents included:

- 136 • Cycle 3 KTIP Assessment or in-kind example such as a developed standards-based unit of study
- 137 or a Teacher Work Sample for candidates who did not participate in KTIP
- 138 • Self-survey based on the Kentucky Teacher Standards (Entry Level) and supported by self-
- 139 reporting evidence and examples (Teacher Skills Assessment, Stronge, 2006)
- 140 • A Professional Growth Plan (PGP) that is relevant to the Teacher Leader Master's Degree or
- 141 Planned Non-Degree Fifth-Year Program
- 142 • A completed Dispositions Survey (i.e., Borich Teacher Disposition Index, 200X, or Strength
- 143 Finder, Gallup)
- 144 • A vitae of Professional Activities to date
- 145 • Two referrals from the following
- 146
- 147 ○ School principal or designee referral listing:
  - 148 ■ Specific standards in which the candidate shows strength
  - 149 ■ Specific standards in which the candidate needs growth
  - 150 ■ Areas that would aid growth in collaboration efforts on a team and/or grade
  - 151 level
  - 152 ■ Areas that would aid the school/district in meeting School Improvement Plan
  - 153 (SIP) goals
- 154 ○ Colleagues:
  - 155 ■ Specific standards in which the candidate shows strength
  - 156 ■ Specific standards in which the candidate needs growth

- 157                   ▪ Areas that would aid growth in collaboration efforts on a team and/or grade
- 158                   level
- 159                   ▪ Areas that would aid the school/district in meeting SIP goals
- 160

161

162

163   **Level 1**

164   Level 1 will be individualized based upon the candidate’s level of proficiency upon entrance to the  
165   program. Proficiencies will be determined by use of documents from the Entry Assessment Module and  
166   faculty advisement. Candidates will be required to take a minimum of 10 out of 19 available hours. If  
167   found to be highly proficient based on submitted documentation, candidates will have the option of  
168   completing the performance-based assessments for Level 1 without the prescribed coursework.  
169   Candidates attempting this option must score a 3 on all performance assessments for Level 1.

170   The delivery options include face-to-face meetings, online instruction through Blackboard and other  
171   web-based delivery methods, and small group meetings.

172   Within courses, candidates will be assigned to Professional Learning Communities (PLC) designed to  
173   include teachers of diverse content and developmental levels in order to assure a global view of the  
174   entire education spectrum. This model will advocate a learning community demonstrated by people  
175   from multiple constituencies, at all levels, collaboratively and continually working together (Louis &  
176   Kruse, 1995 as reported by SEDL, 2009). This model embodies what the National Commission on  
177   Teaching and America’s Future (NCTAF) espouses that teachers cannot teach well unless there are  
178   “Strong Learning Communities” as the core for improving schools and teaching (Dufour, 2008). Such  
179   collaborative work is grounded in what Newmann (reported by Brandt, 1995) and Louis and Kruse label  
180   “reflective dialogue,” in which conversations are conducted about students, teaching, and learning and  
181   identifying related issues and problems. Participants in such conversations learn to apply new ideas and  
182   information to problem-solving techniques and are able to create new conditions for students. Key  
183   tools in this process are shared values and vision; supportive, physical, temporal, and social conditions;  
184   and a shared personal practice (SEDL, 1997). WKU is becoming a member of the Professional Learning  
185   Communities that are emerging in its constituent school districts. In order to be seen as partners and  
186   allies with the districts they serve, the College of Education & Behavioral Science administrators and  
187   faculty members are making concerted and focused efforts to (a) consistently dialogue in formal and  
188   informal settings with schools and districts to share visions and a sense of purpose; (b) actively  
189   demonstrate heightened interest and engagement in the learning process; (c) involve schools and  
190   districts in university decision making and becoming involved in decision making at the school district;  
191   (d) develop collegial relationships among teachers; and (e) foster positive, caring student-teacher-  
192   administrator-university relationships.

193

194 Additionally, Professional Learning Communities will be a working model at WKU in order to assure  
195 consistency and relevance in coursework, to serve as a monitoring system to assure that candidates not  
196 reaching full potential in coursework and assessment protocols are provided services (RTI) in a timely  
197 manner, and to provide a conduit for an accountability and reliability system of analyzing candidate  
198 assessments. Teams of WKU faculty from the education units have been trained in the PLC model and  
199 are actively practicing it within the unit structure.

200

## 201 **Level 1 Courses**

### 202 **1. Teacher Leadership I (3 hours) Required Course**

#### 203 **Rationale for the Teacher Leadership Course**

204 Danielson (p. 12) defines teacher leadership as “that set of skills demonstrated by teachers who  
205 continue to teach students but also have an influence that extends beyond their own classrooms to  
206 others within their own school and elsewhere.” It entails teachers organizing and facilitating others with  
207 the goal of improving the school’s performance in critical responsibilities involved in teaching and  
208 learning.

209 Teacher leadership also requires developing and recognizing leadership skills and dispositions in order to  
210 work in collaborative relationships with colleagues to mobilize when an opportunity or problem  
211 presents itself. Michael Fullan (2001) says, “The litmus test of all leadership is whether it mobilizes  
212 people’s commitment to putting their energy into actions designed to improve things. It is individual  
213 commitment, but above all it is collective mobilization” (p. 9). The type of leadership a teacher displays  
214 can be formal or informal, direct or indirect. Teachers may have a title with specific job responsibilities,  
215 or they may demonstrate leadership through marshalling colleagues, students, and/or other  
216 stakeholders into accomplishing a goal. They may serve as the designated “head” of a team or as an  
217 active participant.

218 In this course, candidates will be provided with a definition, context, and the impact of teacher  
219 leadership. Candidates will explore the framework for teacher leadership and the relevant skills  
220 necessary to be leaders.

#### 221 **Course Objectives:**

222 At the conclusion of the course, the candidates will be able to . . .

- 223 • Demonstrate an understanding of the importance of quality leadership in schools
- 224 • Elucidate how Teacher Leaders perform a variety of roles to help influence student  
225 learning
- 226 • Explicate different theories about motivating faculty and students
- 227 • Work more effectively with other teachers to help them grow as instructors and  
228 contributors to the profession

- 229 • Demonstrate basic leadership skills (e.g., communication, conflict management,  
230 group processes, etc.) necessary to lead effectively in education environments
- 231 • Help facilitate others in organizational improvement processes (i.e., effective  
232 change efforts)
- 233 • Demonstrate the ability to work effectively with others both inside and outside the  
234 school
- 235 • Understand the concept and development of effective Professional Learning  
236 Communities (PLC)
- 237 • Plan effective professional development for individuals and groups in school settings
- 238 • Use self-reflection as a vehicle for all improvement efforts, both personal and  
239 organizational

240

241 Kentucky Teacher Standards Addressed:

242 Standard 8: Collaborates with colleagues/parents/others (8.1-8.4)

243 Standard 9: Evaluates teaching and implements professional development (9.1-9.4)

244 Standard 10: Provides leadership within school/community/profession (10.1-10.4)

245

246 Kentucky Teacher Standards Assessed:

247 Standard 8: Collaborates with colleagues/parents/others (8.1-8.4)

248 Standard 10: Provides leadership within school/community/profession (10.1-10.4)

249

250 Critical Performances or Evidence Required for Proficiency Assessment:

251 Professional Activities Vitae: Using the Entry Level KY Teacher Standards supported by  
252 self-reported evidence and examples, submit a vitae that describes and documents  
253 teaching activities that involve (a) students' families and community, (b) collaboration  
254 with colleagues, and (c) growth as a learner. Provide evidence for each activity that  
255 demonstrates the direct or indirect effect on student learning.

## 256 **2 A-D. Integrated Core Courses** (6-13 hours) Required

257 Hours determined by the Entry Assessment and a faculty advisor. Courses included in the integrated  
258 core focus are A) Curriculum Development, B) Classroom Instruction, C) Assessment and Data Analysis,  
259 and D) a specific content course. The Classroom Instructional course and the Assessment and Data  
260 Analysis course are divided into independent modules.

## 261 **Rationale for the Integrated Core Courses**

262 Robert Marzano (2003b) articulates a framework for understanding the characteristics of effective  
263 schools and effective teachers in these schools: 1) use of effective classroom strategies; 2) use of  
264 effective classroom management strategies; and 3) design of effective classroom curricula. Marzano  
265 summarizes the research of Nye and colleagues (2004):

266 ...indicates that students who have a teacher at the 75<sup>th</sup> percentile in terms of pedagogical  
267 competence will outgain students who have a teacher at the 25<sup>th</sup> percentile by 14 percentile  
268 points in reading and 18 percentile points in mathematics....indicates that students who have a  
269 90<sup>th</sup> percentile teacher will outgain students who have a 50<sup>th</sup> percentile teacher by 13 percentile  
270 points in reading and 18 percentile points in mathematics. (p. 2)

271 In translation to real-world teacher preparation, it is imperative that teachers be skilled at high levels of  
272 proficiency. In order for students to learn at high levels, the teachers instructing them must do the  
273 same.

274 High stakes testing has resulted in acute measurement of student learning, and teachers have begun the  
275 quest to set high goals for student achievement based on assessment results. Through the work with the  
276 practitioners, administrators in particular, an identified need surfaced that teachers be adept at  
277 “unpacking” or disaggregating standards in order to articulate high learning goals relative to their  
278 particular curriculum and development level. Based on those results, teachers should design and  
279 implement instruction utilizing appropriate, research-based pedagogical skills.

280 In order for students to be moved consistently and appropriately along the learning continuum, teachers  
281 need to become researchers within their own classrooms, in that they need to raise questions relative to  
282 what they think and observe about their teaching and their students’ learning (MacLean & Mohr, 1999  
283 p. x). Teachers must be able to analyze educational research and policies and explain the implications for  
284 their own practice and for the profession. Instruction implemented by a teacher operating through a  
285 standards-based model becomes data driven based on effective, scientifically-based sound instruction,  
286 pedagogy, and content. The teacher assumes the role of researcher, in that he or she asks questions  
287 and evaluates the quality of instructional strategies/techniques and their effects on student learning. In  
288 essence, the teacher is able to critically evaluate the student outcomes through formative and  
289 summative assessments, produce interventions, and use the information gained through analyses to  
290 plan for future instruction. In order to prepare teachers to be researcher-leaders, the focus of the  
291 Integrated Core Courses is to enable candidates to reach proficiency. The premise of this program is  
292 that it is job-embedded. Therefore, it is essential that teacher candidates be exposed to teaching  
293 situations beyond their present assignment. The PLC model will address two major exposure concerns:  
294 (1) the need for candidates to experience teaching situations representing various forms of diversity in  
295 students and teaching contexts, and (2) the need to better understand the parameters of teaching in a  
296 variety of content, developmental, and specialist areas in order to better participate in Response to  
297 Intervention (RTI) models for students representing learning difficulties.

298 1) Diversity

299 What constitutes diversity is based on several interpretations. Diversity can be measured by  
300 culture, ethnicity, economic levels, learning abilities, and language barriers. Payne (2005)  
301 further identifies the area of diversity related to poverty and gives the definition as “the extent  
302 to which an individual does without resources” (p. 8). Payne identifies these resources as being  
303 financial, emotional, mental, spiritual, physical, support systems, relationships/role models, and  
304 knowledge of the hidden rules of the class structures.

Two major sources of diversity in the classroom are exceptional needs inclusion policies and the growing number of immigrant students. Major changes in how special needs students are educated in public schools have increased diversity in regular classrooms (MetLife, p. 60). Today, 43% of teachers agree that their classes have become so mixed in terms of student learning abilities that they can't teach them effectively (Metlife, p. 60). In addition, according to the National Center for Education Statistics (2006), one in five children (20%) between the ages of 5 and 17 in the U.S. spoke a language other than English at home, an increase from 9% in 1979. In 2006, one-quarter (25%) of students not speaking English at home spoke with difficulty (Planty et al., 2008). Yet, neither the educational experiences nor the backgrounds and attitudes of prospective teachers equip them to participate in the culture of schooling envisioned for an increasingly pluralistic society. These prospective teachers, overwhelmingly white, middle class, and typically monolingual, bring little intercultural experience from their largely suburban and small-town backgrounds (Zimpher, 1989).

In the *MetLife Survey of the American Teacher: Past, Present, and Future* (2008), the comparison to the past also reveals that some longstanding challenges have increased. Those six factors, that go beyond the reach of the classroom but can hinder students from learning to their full potential, include violence, English language facility, poor nutrition, lack of parental support or help, poor physical condition, and poverty. Today, half (49%) the teachers in the survey indicated that poverty hinders learning for at least one-quarter of their students, compared to 41% in 1992. More teachers (43%) agree that their classes have become so mixed in terms of student learning abilities that they can't teach effectively, as compared to 39% in 1988. In addition, nearly twice as many teachers today, as compared to 1992, say that a lack of facility in English hinders learning for at least one-fourth of their students (22% vs. 11%). The problem is even greater in urban schools (30%). Urban schools generally showed less progress in many areas when compared to rural and suburban schools in the five challenge areas of poverty, nutrition, English language facility, physical condition, and violence. Of those teachers who report that poverty is a problem for at least one-quarter of their students, 80% say that their training has prepared them very or somewhat well to deal with the issue.

More than a third (36%) of teachers in schools where one-quarter or more students have nutrition problems affecting learning do not feel their training prepared them well to deal with the issue. Of those teachers working in schools where at least one-quarter of the students face health related problems, nearly four in ten (38%) feel not well prepared, or poorly prepared, to deal with such issues; 15% of principals say that teachers are not well prepared by their training to deal with physical condition issues.

For those teachers who report that at least one-quarter of their students face lack of parental support or help as an obstacle to their learning, eight in ten (79%) say that their training and education have prepared them either very or somewhat well to deal with this lack of support.

346 Teachers for whom at least one-quarter of their students are hindered in learning by violence  
347 disagree about their preparation: just under two-thirds (63%) feel very well or somewhat  
348 prepared, and just over one-third (36%) feel not well or poorly prepared (p. 121-128). To  
349 address these issues, Banks (1991a) notes the importance of integrating multicultural education  
350 within the teacher education curriculum:

351  
352 An effective teacher education policy for the 21st century must include as a  
353 major focus the education of all teachers, including teachers of color, in ways  
354 that will help them receive the knowledge, skills, and attitudes needed to  
355 work effectively with students from diverse racial, ethnic, and social class  
356 groups. (pp. 135-136)

357  
358 So how can these major issues for teaching be addressed in a program, as not all candidates are  
359 exposed to all of these issues and the major tenet of the proposed program is for the work to be  
360 job-embedded? Participation in the PLC groups will allow candidates to dialogue and share  
361 experiences from their classrooms with other candidates. Purposeful configuration of the PLC  
362 groups will allow teachers access through insights from other practitioners' experiences on  
363 pedagogy and outcome measures that may differ from their own.

## 364 2) Response to Intervention

365 The Individuals with Disabilities Education Act (IDEA, 2004) authorized local education agencies  
366 to use Response to Intervention (RTI) models. RTI is an integrated approach that includes  
367 general, remedial, and special education based on a three-tiered model that monitors student  
368 progress with different levels of intervention intensity. By providing scientifically-based  
369 interventions to students, monitoring progress on interventions, and using this information to  
370 determine those in need of more intensive services, RTI also builds on the requirements of No  
371 Child Left Behind (NCLB). There is a two-tiered implication for the master's program. Teacher  
372 candidates will be taught to understand the models for RTI in P-12 settings, and secondly, WKU  
373 will support teacher candidates through RTI models that identify and support candidates  
374 struggling to meet proficiency in coursework and assessment projects.

375  
376 A major focus when designing the content for the Integrated Core was the deficit in assessment  
377 capabilities of teachers revealed in the survey and focus group data. Graduate candidates continue to  
378 have difficulty aligning assessments to the cognitive complexity and content articulated in state  
379 standards. According to the WKU Assessment Report for Initial Preparation Programs, 74% of pre-  
380 service teachers "passed" the assessment standard (Table 13), which had the lowest percentage of all  
381 standards. According to the student teaching evaluation proficiency rates noted in the same report, the  
382 assessment standard ranked as one of the lowest at 92% (Table 14). In the WKU College of Education  
383 and Behavioral Sciences Practitioner Survey, the average for "utilizing varied types of assessments" was  
384 3.6 on a scale of one to five. Again, this ranked as one of the lowest items marked. These results

385 suggest that more time in the Teacher Leader Master's Degree or Planned Non-Degree Fifth-Year  
386 Program needs to be devoted to crafting high quality assessments.

387  
388 Stiggins (2002) writes that teachers need to be able to use classroom formative assessment processes  
389 and a constant flow of information about student achievement in order to advance student learning.

390 They do this by:

- 391 • *understanding and articulating in advance of teaching the achievement targets that their*  
392 *students are to hit;*
- 393 • *informing their students about those learning goals, in terms that students understand, from the*  
394 *very beginning of the teaching and learning process;*
- 395 • *becoming assessment literate and, thus, able to transform their expectations into assessment*  
396 *exercises and scoring procedures that accurately reflect student achievement;*
- 397 • *using classroom assessments to build students' confidence in themselves as learners and help*  
398 *them take responsibility for their own learning, so as to lay a foundation for lifelong learning;*
- 399 • *translating classroom assessment results into frequent descriptive feedback (versus judgmental*  
400 *feedback) for students, providing them with specific insights as to how to improve;*
- 401 • *continuously adjusting instruction based on the results of classroom assessments;*
- 402 • *engaging students in regular self-assessment, with standards held constant so that students can*  
403 *watch themselves grow over time and, thus, feel in charge of their own success; and*
- 404 • *actively involving students in communicating with their teacher and their families about their*  
405 *achievement status and improvement. (p. 5)*

406  
407 In short, the effect of assessment for learning, as it plays out in the classroom, is that students keep  
408 learning and remain confident that they can continue to learn at productive levels if they keep trying to  
409 learn (Stiggins, 2002, p. 5).

410  
411 In its 2001 report, the Committee on the Foundations of Assessment of the National Research Council  
412 advanced recommendations for the development of assessment in American schools that included the  
413 following:

414  
415 *Recommendation 9: Instruction in how students learn and how learning can be assessed*  
416 *should be a major component of teacher preservice and professional development*  
417 *programs. This training should be linked to actual experience in classrooms in assessing*  
418 *and interpreting the development of student competence. To ensure that this occurs,*  
419 *state and national standards for teacher licensure and program accreditation should*  
420 *include specific requirements focused on the proper integration of learning and*  
421 *assessment in teachers' educational experience. (Pellegrino, Chudowsky, Glaser, p. 14)*

422  
423 Henning (2006) recommended that instructors in the teacher-leadership program teach data  
424 manipulation and transformation strategies, i.e., histograms, charts, graphs, or frequency distribution  
425 charts. Henning further suggested instructors emphasize that conclusions drawn from data analysis

426 must match the statistical procedure used. Therefore, in response to these works and the data collected  
427 from surveys and focus groups of practitioners in the WKU service area, a strong emphasis on  
428 assessment and data analysis has been included.

429 Instruction for the Level 1 courses will utilize a mixed delivery system of online, face-to-face, and hybrid  
430 combinations. Courses are divided into modules with separate hour designations to meet the needs of  
431 candidates not requiring all of the content of the courses. During instruction, candidates will utilize the  
432 information being explored in the modules/courses in their regular instructional setting. These job-  
433 embedded clinical experiences will be focused on real-time instructional activities in the classroom. In  
434 order to facilitate professional development and higher levels of teacher quality, candidates will be  
435 expected to continually analyze and reflect on the impact on student learning through Professional  
436 Learning Communities (PLC). Candidates will be assigned to Professional Learning Communities that will  
437 include P-12 teachers of diverse content and developmental grade levels and also ESL, Exceptional  
438 Needs, etc., in order to assure a more global view of the entire education spectrum. The PLC's will meet  
439 to exchange classroom experiences related to course content, discuss student progress, clarify and  
440 refine pedagogy, and analyze assessment data. Involvement in a PLC will also provide skill development  
441 of teacher leadership in a collegial atmosphere.. WKU faculty will assume the role of facilitators and  
442 team members of the small groups. These meetings will be held face-to-face or virtually according to the  
443 discretion of the group and instructor (see Instructional Model Diagram 3). All courses were designed  
444 by teams of WKU faculty and district practitioners.

445 **A. Curriculum Development Course** (3 hours) Required course  
446 Professional Learning Community (PLC) participation required

447  
448 Course Objectives:

449 At the conclusion of the course, the K-12 teacher will be able to . . .

- 450 • Organize curriculum for horizontal and vertical alignment
- 451 • Understand the elements of a standards-based unit
- 452 • Incorporate state curriculum guidelines
- 453 • Develop a standards-based instructional unit incorporating Depth of Knowledge (DOK) and  
454 taxonomies
- 455 • Develop, correlate, analyze, and provide appropriate assessment and feedback for individual  
456 units
- 457 • Integrate and sequence appropriate content knowledge into the unit
- 458 • Develop an awareness of instructional quality

459  
460 Kentucky Teacher Standards Addressed:

461 Standard 1: The teacher demonstrates applied content knowledge (1.1-1.5)

462 Standard 2: The teacher designs and plans instruction (2.1-2.5)

463 Standard 3: The teacher creates and maintains learning climate

464 Standard 4: The teacher implements and manages instruction

- 465 Standard 5: The teacher assesses and communicates learning results
- 466 Standard 6: The teacher demonstrates the implementation of technology
- 467 Standard 7: The teacher reflects on and evaluates teaching and learning (7.1-7.3)

468

469 Kentucky Teacher Standards Assessed in this course:

- 470 Standard 1: The teacher demonstrates applied content knowledge (1.1-1.5)
- 471 Standard 2: The teacher designs and plans instruction (2.1-2.5)
- 472 Standard 3: The teacher creates and maintains learning climate
- 473 Standard 7: The teacher reflects on and evaluates teaching and learning (7.1-7.3)

474

475 Critical Performances or Evidence Required for Proficiency Assessment:

- 476 • Open Response Questions: Complete open response questions that are based on content
- 477 knowledge in the candidate's teaching certification area and stemming from the KY Program of
- 478 Studies and Core Content
- 479 • Standards-Based Unit: Design and implement a unit of study with a sequence of lessons,
- 480 including all materials and samples of student work. Unit must also include use of integrated
- 481 technology by teachers/students. Length of unit commensurate with Program of Studies, Core
- 482 Content, and developmental level of candidate's students.
- 483 • Comparison Analysis: Submit an analysis of a before-course and end-of-course unit of study
- 484 including (a) an analysis of the end-unit in terms of instructional soundness and evidence of
- 485 student learning, (b) a reflection of personal growth or the need for growth as the result of
- 486 teaching the unit.

487

488 **B. Classroom Instruction** (three 1-hour modules)

489 Professional Learning Community (PLC) participation required

490

491 **Classroom Instruction: Instructional Strategies (1 hour)**

492 Course Objectives:

493 At the conclusion of the course, the K-12 teacher will be able to . . .

- 494 • Explore research-based best practices, analysis, and implications for use
- 495 • Describe the theoretical basis for each best practice
- 496 • Evaluate the influence of individual differences on teaching and learning
- 497 • Evaluate sample lessons that utilize research-based best practices
- 498 • Identify ways in which best practices can enhance learning by diverse students
- 499 • Demonstrate a working knowledge of the research-based best practices by developing
- 500 lesson plans for those practices
- 501 • Implement lesson plans using selected best practices in a classroom and evaluate the
- 502 success of the implementation
- 503 • Develop resources in educational technology

- 504                   • Utilize technology to communicate knowledge, ideas, and information about the  
505                   instructional strategies with other class members

506  
507                   **Classroom Instruction: Equitable Schools (1 hour)**

508  
509                   Course Objectives:

510                   At the conclusion of the course, the K-12 teacher will be able to . . .

- 511                   • Examine the role of school and stakeholder partnerships both at the school and district  
512                   level in student achievement
- 513                   • Explore theory and research related to school and stakeholder partnerships
- 514                   • Evaluate sample partnership plans that utilize research-based best practices
- 515                   • Determine the components of successful school and stakeholder partnerships
- 516                   • Analyze research relating to culturally diverse populations, school and stakeholder  
517                   partnerships, and increased student achievement
- 518                   • Identify ways in which school and stakeholder partnerships can enhance the learning of  
519                   diverse students
- 520                   • Develop resources in educational technology
- 521                   • Develop methods in which technology will increase the likelihood of successful school  
522                   and stakeholder partnerships
- 523                   • Utilize technology to communicate knowledge, ideas, and information about school and  
524                   stakeholder partnerships with other class members
- 525                   • Create a school and stakeholder partnership plan designed to enhance student success  
526                   for a selected school
- 527                   • Enlist the input of school leaders and stakeholders to develop, revise, and possibly  
528                   implement a school and stakeholder partnership plan

529  
530                   **Classroom Instruction: Student Centered Learning and Engagement (1 hour)**

531  
532                   Course Objectives:

533                   At the conclusion of the course, the K-12 teacher will be able to . . .

- 534                   • Discuss learning theories with application to student-centered learning in diverse  
535                   classroom settings
- 536                   • Demonstrate an understanding of classroom management in context: elementary,  
537                   middle, and high school settings for diverse student populations
- 538                   • Examine various ways to promote student motivation through productive classroom  
539                   management, instruction, and assessment best practices
- 540                   • Analyze the classroom teacher role as a teacher leader in the areas of classroom  
541                   management and student motivation
- 542                   • Utilize technology to support classroom management and student motivation initiatives  
543                   to improve student achievement
- 544

545 Kentucky Teacher Standards Addressed:

546 Standard 1: The teacher demonstrates applied content knowledge

547 Standard 2: The teacher designs and plans instruction

548 Standard 3: The teacher creates and maintains learning climate (3.1-3.5)

549 Standard 4: The teacher implements and manages instruction (4.1-4.5)

550 Standard 5: The teacher assesses and communicates learning results

551 Standard 6: The teacher demonstrates the implementation of technology (6.1-6.5)

552 Standard 7: The teacher reflects on and evaluates teaching and learning

553

554 Kentucky Teacher Standards Assessed in this course:

555 Standard 3: The teacher creates and maintains learning climate (3.1-3.5)

556 Standard 4: The teacher implements and manages instruction (4.1-4.5)

557 Standard 6: The teacher demonstrates the implementation of technology (6.1-6.5)

558

559 Critical Performances or Evidence Required for Proficiency Assessment:

560 **All performances are required regardless of the number of modules the candidate takes.**

561

562 • Video Lesson: Video with analysis of candidate engaging students in a lesson that utilizes  
563 technology

564 • Contextual Factors: A contextual summary of the school/classroom environment, the class  
565 makeup, and other factors that may influence instruction

566 • Instructional Materials: Submission of instructional materials with explanation of use that  
567 supports a learning experience

568 • Personal Commentary: A commentary analyzing personal teaching

569

570 **C. Assessment and Data Analysis** (one 2-hour module and two 1-hour modules)

571 Professional Learning Community (PLC) participation required

572

573 **Assessment and Data Analysis: Analysis of Data to Improve Student Learning (2 hours)**

574 Course Objectives:

575 At the conclusion of the course, the K-12 teacher will be able to . . .

576 • Explain the principles that guide educators in the process of selecting, developing, and using  
577 educationally meaningful assessments

578 • Create assessments that align to the cognitive complexity and content articulated in state  
579 standards

580 • Analyze the variety of assessments within a practitioner's classroom

581 • Craft a formative and summative assessment plan for a unit of instruction

582 • Utilize a continuous assessment model

583 • Demonstrate understanding of assessment for learning versus assessment of learning

584           **Assessment and Data Analysis: Evaluating Classroom Assessments**

585

586           Course Objectives:

587           At the conclusion of the course, the K-12 teacher will be able to . . .

- 588           • Explain the eight forms of validity evidence and the three types of reliability evidence
- 589           • Compute simple descriptive statistics for assessment data
- 590           • Understand and apply the principles of level of measurement to calculations on classroom  
591           and school data
- 592           • Articulate a philosophy for evaluating student progress
- 593           • Understand professional/legal/ethical issues involved in the assessment of students
- 594           • Utilize data from student results to bring every student to mastery level

595           **Assessment and Data Analysis: Utilizing Standardized Tests**

596           Course Objectives

597           At the conclusion of the course, the candidate will be able to . . .

- 598           • Explain the principles of psychometric analysis that underlie the construction of  
599           standardized assessment instruments
- 600           • Distinguish between and interpret norm-referenced and criterion-referenced assessments
- 601           • Analyze school and classroom data from standardized tests to inform school improvement  
602           efforts
- 603           • Incorporate results from standardized assessments into a school improvement plan
- 604           • Employ strategies that assist students in developing test taking skills
- 605           • Utilize data from student results to bring every student to mastery level

606

607

608           Kentucky Teacher Standards Addressed:

609           Standard 1: The teacher demonstrates applied content knowledge

610           Standard 2: The teacher designs and plans instruction

611           Standard 3: The teacher creates and maintains learning climate

612           Standard 4: The teacher implements and manages instruction

613           Standard 5: The teacher assesses and communicates learning results (5.1-5.6)

614           Standard 6: The teacher demonstrates the implementation of technology

615           Standard 7: The teacher reflects on and evaluates teaching and learning (7.1-7.3)

616

617           Kentucky Teacher Standards Assessed in this course:

618           Standard 5: The teacher assesses and communicates learning results (5.1-5.6)

619           Standard 7: The teacher reflects on and evaluates teaching and learning (7.1-7.3)

620

621           Critical Performances or Evidence Required for Proficiency Assessment:

622           **All performances are required regardless of the number of modules the candidate takes.**

623

- 624       • Contextual Factors: Provide a detailed evaluation of the student population using quantitative  
625       and qualitative data including a description of diverse needs of the students  
626       • Analysis of Student Learning: Collect responses to three assignments/prompts from three  
627       students of representative diversity and analyze the growth of student learning giving details of  
628       the instructional methods employed  
629       • Reflection: Write a reflection of personal growth attained as the result of Professional Learning  
630       Community discussions, classroom experiences, and coursework achievement and/or the need  
631       for growth as the result of the analysis of the student learning results.

632   **D. Content Course** (3 hours) Required Course:

633   Students will select a minimum of one existing content course specific to their initial teaching  
634   certification area that augments their knowledge of the content area based on entry level assessments.

635       Course Objectives:

636       At the conclusion of the course, the candidate will be able to . . .

- 637       • Gain additional content knowledge

638       Kentucky Teacher Standards Addressed:

639               Standard 1: The teacher demonstrates applied content knowledge

640

641       Kentucky Teacher Standards Assessed in this course:

642               Standard 1: The teacher demonstrates applied content knowledge

643

644   Critical Performances or Evidence Required for Proficiency Assessment:

- 645       • Open Response Questions: Complete open response questions designed by the content specific  
646       faculty that are based on content knowledge in candidate's teaching certification area and stem  
647       from the Kentucky Program of Studies and Core Content and/or other state curriculum  
648       documents

649

650   **5. Action Research Module** (2 hours) Required

651   An online course to prepare candidates for the capstone Action Research Project will be required.

652   Candidates will begin reflecting on an area of general interest, begin collecting initial data, and prepare a  
653   preliminary prospectus for the action research project that can be conducted while taking or at the  
654   completion of Level 2 courses. This course ideally will be taken just prior to the initiation of the  
655   Participatory Action Research Project and may be taken during Level 1 or Level 2.

656

657       Course Objectives:

658       At the conclusion of the course, the candidate will be able to . . .

- 659       • Explore the use of action research as part of a school improvement strategy  
660       • Analyze and explore current topics in education research

- 661 • Integrate theoretical and experiential knowledge into instruction
- 662 • Frame questions appropriate for classroom and school inquiry
- 663 • Gain skills in selected qualitative and quantitative research methods
- 664 • Enable candidates to develop, pursue, document, and report on an action research
- 665 inquiry
- 666 • Enable candidates to present their findings to a broader audience

667  
668 Kentucky Teacher Standards Addressed:

669 A minimum of three Kentucky Teacher Standards must be addressed in the capstone Action  
670 Research Project to be completed by the conclusion of the degree program.

671  
672 Kentucky Teacher Standards Assessed in this course:

673 Candidate may choose a minimum of three standards

674  
675 Critical Performances or Evidence Required for Proficiency Assessment:

- 676 • Development of research question(s)
- 677 • Literature Review
- 678 • Outline for project
- 679 • Timeline for project
- 680 • Prospectus for an Action Research Project relevant to the candidate's work environment

681  
682 At the conclusion of the Action Research Project:

- 683 • Presentation and scoring of the project by a university faculty member, school district/school  
684 representative, and any other stakeholders influenced by the project

### 685 686 **Mid-Point Assessment**

687 (See the Summary of the Assessments, Diagram 6)

688 During the prescribed individual coursework for Level 1, each candidate will complete assessments that  
689 evidence job-embedded proficiency in the concomitant skills. Assessments on the candidate's ability to  
690 develop and implement standards-based units of study, to impact student learning through class  
691 instruction, to assess and analyze student achievement, to grow professionally, and to collaborate and  
692 lead will be administered and scored by the faculty throughout the coursework and uploaded to the  
693 Electronic Portfolio System (EPS). The assessments include observations, videos, student work samples  
694 with analyses, presentations, interviews, Teacher Work Samples, and/or other standards-based unit  
695 formats. In addition, the Teacher Leader Master's Degree or Planned Non-Degree Fifth-Year Program  
696 candidate will submit an Analytical Reflection Summary of practice and revised Professional Goals based  
697 on Level 1 experiences and complete three (3) open response questions based on content knowledge in  
698 the candidate's teaching certification area and in alignment with the Kentucky Program of Studies.  
699 Also, the candidates will submit an analytical reflection summary of their progress since the Entry  
700 Assessment Seminar at the induction to the program. The candidate's Analytical Reflection Summary

701 and revised professional goals will then guide the candidate and advisor in determining the course of  
702 study for Level 2.

703 Several districts have requested that they submit a mid-point check sheet similar to the Entry Level  
704 Referral to provide further feedback on the level of proficiency the teacher demonstrates.

705 At the end of Level 1, the assessment performances will be reviewed and assessed holistically by faculty  
706 and practitioners. The review will 1) determine if the candidate is proficient in the skills addressed in  
707 Level 1, 2) determine both if the candidate needs additional work in Level 1 topics and/or the course of  
708 study appropriate for the candidate in Level 2, and 3) validate and assure reliability. The review will  
709 provide feedback that allows the candidate and advisor(s) to alter the program of studies, if needed. The  
710 successful results of the Level 1 assessments will be an overall score of 3.0, with no individual score less  
711 than 2.5. Success in the Level 1 assessments will determine movement to Level 2.

712

## 713 **Level 2**

714 Level 2 will be global, in that choices will be made available in areas pertinent to the professional career  
715 goals of each candidate.

716 Level 2 coursework will be determined based on the assessment at the conclusion of Level 1. Each  
717 program will be individualized based on the candidate's assessment results, professional goals, and  
718 growth plan. In the Level 2 program, candidates will (a) take additional courses to attain Level 1  
719 proficiencies or (b) specialize in an area. Examples:

- 720 • Candidates could take a mix of content and pedagogy to improve P-12 classroom practice.
- 721 • Candidates could start taking leadership courses to fast track the Rank I for administration and  
722 to develop them for schoolwide teacher leader roles such as department head, school-based  
723 decision making member, etc.
- 724 • Candidates could work toward an endorsement, such as in technology or Gifted and Talented.

## 725 **Level 2 Courses**

726 Candidates will have flexibility in Level 2 coursework dependent upon the completion of Level 1, thus  
727 allowing more distance toward other certificates in Level 2 and/or Rank I. This would ultimately impact  
728 pre-service teachers by encouraging them to hone content and practice experiences throughout pre-  
729 service coursework, Student Teaching, and the Internship year in order. This approach will better  
730 prepare the candidate for the Teacher Leader Master's Degree or Planned Non-Degree Fifth-Year  
731 Program and the completion of Level 1 more effortlessly.

732 Level 2 instruction will utilize a hybrid system of online and face-to-face delivery. Courses will be  
733 content, pedagogy, and/or leadership specific based on each individual's prescribed program. A strong  
734 reliance will exist on the arts and sciences as well as on specialized areas in the College of Education and

735 Behavioral Sciences. Courses also will come from existing courses in the College of Education and  
736 Behavioral Sciences, Potter College of Arts and Letters and Ogden College of Science and Engineering.

737 Assessments will be conducted within the course structures to determine the level of proficiency in each  
738 independent area. The results of these assessments will determine entry into the Action Research  
739 phase, which includes a module/course in the preparation for action research. After successful  
740 completion of the Action Research preparation, candidates will conduct an Action Research project (see  
741 the Summary of the Assessments, Diagram 6).

#### 742 **Action Research Capstone Project**

743  
744 An Action Research Capstone Project will be conducted throughout Level 2 or at the conclusion of  
745 coursework for Level 2. If the project is conducted at the conclusion of Level 2 coursework, the  
746 recommendation will be made that the Action Research module course be taken just prior to the  
747 initiation of the project. The Action Research Project requiring the candidate to employ the leadership  
748 skills the Teacher Leader Master's Degree or Planned Non-Degree Fifth-Year Program is designed to  
749 develop will be referred to as Participatory Action Research (PAR).

750 Teachers are subjective insiders involved in classroom instruction as they go about their daily routines of  
751 instructing students, grading papers, taking attendance, evaluating their performance, and reviewing  
752 the curriculum. Traditional educational researchers who develop questions, design studies around those  
753 questions, and conduct research within the schools are considered objective outside observers of  
754 classroom interaction. However, when teachers become teacher-researchers, the traditional  
755 descriptions of both teachers and researchers change. Teacher-researchers raise questions about what  
756 they think and observe relative to teaching and student learning. They collect student work in order to  
757 evaluate performance, but they also perceive student work as data to be analyzed for examining the  
758 resulting teaching and learning (MacLean & Mohr, 1999 p. x).

759  
760 Action Research is a recognized form of experimental research focusing on the effects of the  
761 researcher's direct actions of practice within a participatory community with the goal of improving  
762 performance quality or an area of concern (Dick, 2002; Reason & Bradbury, 2001; Hult & Lennung, 1980;  
763 McNiff, 2002). Action research involves the utilization of a systematic cyclical method of planning, taking  
764 action, observing, evaluating (including self-evaluation), and critical reflecting prior to planning the next  
765 cycle (O'Brien, 2001; McNiff, 2002). The actions contain a set goal of addressing an identified problem in  
766 the workplace; for example, reducing the illiteracy of students through the use of new strategies  
767 (Quigley, 2000). A collaborative method is employed to test new ideas and implement action for change.  
768 Direct participation is involved in a dynamic research process while monitoring and evaluating the  
769 effects of the researcher's actions aimed at improving practice (Dick, 2002; Checkland & Holwell, 1998;  
770 Hult & Lennung, 1980). At its core, action research is a means to increase the understanding of how  
771 change in one's actions or practices can mutually benefit a community of practitioners (McNiff, 2002;  
772 Reason & Bradburym, 2001; Carr & Kremmis 1986; Masters, 1995).

773 *Essentially, Participatory Action Research (PAR) is research which involves all relevant*  
774 *parties in actively examining together current action (which they experience as*  
775 *problematic) in order to change and improve it. They do this by critically reflecting on the*  
776 *historical, political, cultural, economic, geographic and other contexts which make sense*  
777 *of it. Participatory action research is not just research which is hoped will be followed by*  
778 *action. It is action which is researched, changed and re-researched, within the research*  
779 *process by participants. Nor is it simply an exotic variant of consultation. Instead, it aims*  
780 *to be active co-research, by and for those to be helped. Nor can it be used by one group*  
781 *of people to get another group of people to do what is thought best for them - whether*  
782 *that is to implement a central policy or an organizational or service change. Instead it*  
783 *tries to be a genuinely democratic or non-coercive process whereby those to be helped,*  
784 *determine the purposes and outcomes of their own inquiry. (Wadsworth, 1998)*

785 PAR proceeds through repeated cycles in which researchers and the education community start with the  
786 identification of major issues, concerns, and problems; initiate research; originate action; learn about  
787 this action; and proceed to a new research and action cycle. This process is a continuous one.  
788 Participants in Action Research projects continually reflect on their learning from the actions and  
789 proceed to initiate new actions on the spot. Outcomes are very difficult to predict from the outset,  
790 challenges are sizeable, and achievements depend to a very large extent upon the researcher's  
791 commitment, creativity, and imagination. If the repeated cycles are thoughtfully and systematically  
792 followed, preferably in a group context, then (a) issues and understandings and (b) the practices  
793 themselves will develop and evolve.

794 Districts have requested that they be apprised of the Action Research Projects being conducted by their  
795 candidate-teachers. To further encourage district inclusion, the results of the action research projects  
796 will be presented to the district stakeholders involved in the projects.

797

## TEACHER LEADER MASTER’S DEGREE or PLANNED NON-DEGREE FIFTH YEAR PROGRAM DETAILED CONTINUOUS ASSESSMENT PLAN

### Transition Point 1: Admission to MAE Program/Level 1

Note: Evaluation of the candidates’ level of proficiency will be determined by the WKU instructor and a public school representative. Program advisement will be done during Entry Assessment course by the WKU instructor based on the results of the evaluation and professional growth plan.

Graduate Admissions		
Critical Performances	KTS Assessed*	Other Requirements/Notes
N/A	N/A	<ul style="list-style-type: none"> <li>If candidate is WKU alumnus and is teaching, automatic admission.</li> <li>If candidate is alumnus of another KY school with a GPA of 2.5 and is teaching, admit with a teacher work sample or KTIP portfolio for admission credentials review.</li> <li>If candidate is out-of-state student with GPA of 2.5 and currently employed as a KY teacher, admit with a teacher work sample or KTIP portfolio admission credentials review.</li> <li>GRE score on file for non-WKU students.</li> </ul>
<b>Course Title: Entry Assessment (1 hour – required; prerequisite to full MAE Admission)</b>		
Critical Performances	KTS Assessed*	Other Requirements/Notes
Self-Survey based on entry-level KTS and supported by evidence and examples	KTS 7: Reflection/Evaluation KTS 9: Professional Development	<ul style="list-style-type: none"> <li>Submit the Cycle 3 KTIP Assessment OR an in-kind example (for students who did not participate in KTIP)</li> <li>Develop a Professional Activities vitae</li> <li>Complete a Dispositions Survey</li> <li>Referral by a) the school principal or his designee and b) a professional colleague, i.e. team teacher, resource teacher listing i) specific standards/dispositions that the candidate shows strength, ii) specific standards the candidate needs growth, iii) areas that would aid growth in collaborative efforts on a team and/or grade level, and 4) areas that would aid the district in meeting SIP goals. (<b><i>A guided template provided.</i></b>)</li> <li>Referral by a professional colleague, i.e. team teacher, resource teacher,</li> </ul>
Professional Growth Plan (PGP)	KTS 9: Professional Development	

		<p>listing a) specific standards/dispositions that the candidate shows strength b) specific standards/dispositions the candidate needs growth, and c) areas that would aid growth in collaborative efforts on a team, grade, or school level.</p> <ul style="list-style-type: none"> <li>• Submit the School Improvement Plan</li> <li>• Individualize plan of study related to KTS</li> </ul>
--	--	--

*\*CPs may address multiple standards, BUT standards listed are ASSESSED in rubric.*

**Transition Point 2: Admission to Level 2**

Note: All Critical Performances and other requirements must be completed by the end of Level 1 course series. In order to advance to Level 2 of the MAE program, the candidate must have an average score of 3.0 on all performances uploaded to the EPS. Additional course/module work during Level 2 may be required as the result of the assessment results.

Course Title: Teacher Leadership 1 (3 hours – required)		
Critical Performances	KTS Assessed*	Other Requirements/Notes
<p><b>Professional Activities Vitae:</b> Using the Entry Level KY Teacher Standards supported by self-reported evidence and examples submit, a vitae that describes and documents teaching activities that involve a) students' families and community, b) collaboration with colleagues, and c) growth as a learner. Provide evidence for each activity that demonstrates the direct or indirect effect on student learning.</p>	<p>KTS 8: Collaboration KTS 10: Leadership</p>	<p>N/A</p>

Course Title: Curriculum Development (3 hours – individualized based on Entry Assessment)		
Critical Performances	KTS Assessed*	Other Requirements/Notes
<p><b>Open Response Questions:</b> Complete open response questions that are based on content knowledge in candidates' teaching certification area and stemming from the KY Program of Studies and Core Content</p>	<p>KTS 1: Applied Content Knowledge</p>	<p>N/A</p>

Detailed Continuous Assessment Summary 05252009

<p><b>Standards-Based Unit:</b> Design and implement a unit of study with a sequence of lessons, including all materials and samples of student work. Unit must also include use of integrated technology by teachers/students</p>	<p>KTS 2: Designs/Plans Instruction KTS 3: Learning Climate KTS 4: Implements/Manages Instruction KTS 6: Technology</p>	
<p><b>Comparison Analysis:</b> Submit an analysis of a before-course and end-of-course unit of study, including a) an analysis of the end-unit in terms of instructional soundness and evidence of student learning, b) a reflection of personal growth or the need for growth as the result of teaching the unit.</p>	<p>KTS 5: Assesses/Communicates Learning Results KTS 7: Reflection/Evaluation</p>	
<p align="center"><b>Course Title: Classroom Instruction Modules 1-3</b> (Possible 3 hours total – individualized based on Entry Assessment)</p>		
Critical Performances	KTS Assessed*	Other Requirements/Notes
<p><b>Video Lesson:</b> Video with analysis of candidate engaging students in a lesson that utilizes technology.</p>	<p>KTS 6: Technology</p>	<p><b>All CPs are required regardless of the number of modules the candidate takes.</b></p>
<p><b>Contextual Factors:</b> A contextual summary of the school/classroom environment, the class makeup, and other factors that may influence instruction.</p>	<p>KTS 3: Learning Climate</p>	
<p><b>Instructional Materials:</b> Submission of instructional materials with explanation of use that support a learning experience.</p>	<p>KTS 4: Implements/Manages Instruction</p>	
<p><b>Personal Commentary:</b> A commentary analyzing personal teaching.</p>	<p>KTS 7: Reflection/Evaluation</p>	
<p align="center"><b>Course Title: Classroom Assessment Modules 1-2</b> (Possible 3 hours total – individualized based on Entry Assessment)</p>		
Critical Performances	KTS Assessed*	Other Requirements/Notes
<p><b>Contextual Factors:</b> Provide a detailed evaluation of the student population using quantitative and qualitative data including a description of diverse needs of the students.</p>	<p>KTS 3: Learning Climate</p>	<p><b>All CPs are required regardless of the number of modules the candidate takes.</b></p>
<p><b>Analysis of Student Learning:</b> Collect</p>	<p>KTS 5: Assesses/Communicates</p>	

Detailed Continuous Assessment Summary 05252009

responses to three assignments/ prompts from three students of representative diversity and analyze the growth of student learning giving details of the instructional methods employed.	Learning Results	
<b>Reflection:</b> Write a reflection of personal growth or the need for growth as the result of the analysis.	KTS 7: Reflection/Evaluation	
<b>Course Title: Content Specific Course (3 hours – individualized based on Entry Assessment)</b>		
<b>Critical Performances</b>	<b>KTS Assessed*</b>	<b>Other Requirements/Notes</b>
<b>Open Response Questions:</b> Complete open response questions that are based on content knowledge in candidate's teaching certification are and stemming from the KY Program of Studies and Core Content, and or state curriculum documents.	KTS 1: Applied Content Knowledge	

**Transition Point 3: Program Exit**

<b>Course Title: Varied (11-20 hours - required)</b>		
<b>Critical Performances</b>	<b>KTS Assessed*</b>	<b>Other Requirements/Notes</b>
N/A	N/A	<b>Advanced coursework in Leadership, Pedagogy, and Content; Areas of Specialization</b>
<b>Course Title: Action Research Capstone Project</b>		
<b>Critical Performances</b>	<b>KTS Assessed*</b>	<b>Other Requirements/Notes</b>
<b>Action Research Project</b>	Various: The project must address a minimum of three KY Teacher Standards in depth.	<p>Prior to execution of projects, candidates must prepare and receive approval for a prospectus.</p> <p>After presentation to the appropriate entities (i.e., school board, school faculty, other education stakeholders), final project will be posted on EPS.</p> <p>Score of 3 is required. Additionally, KTIP rubrics will be used to measure each KTS addressed in the project. These scores will be entered into the ACCSYS in a fashion similar to the IP TWS indicator scores.</p>

**TEACHER LEADER MASTER’S DEGREE or PLANNED NON-DEGREE FIFTH YEAR PROGRAM  
COURSE DESCRIPTIONS AND SEQUENCE**

**PRE-LEVEL COURSEWORK**

Course Title: Entry Assessment (1 hour – required; prerequisite to full MAE Admission)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>At the conclusion of the course, the students will have...</b></p> <ul style="list-style-type: none"> <li>Submitted the Cycle 3 KTIP Assessment or in-kind document related to KTS.</li> <li>Completed a self-survey based on entry-level KTS and supported by evidence and examples.</li> <li>Developed Professional Activities vitae</li> <li>Completed a Dispositions Survey</li> <li>Procured two referrals from employers and colleagues</li> <li>Developed a Professional Growth Plan (PGP).</li> <li>Prepared with the aid of a faculty advisor an individualized plan of study related to KTS.</li> </ul>	<p>The course provides an orientation and entry-level gate for candidates admitted to the WKU Teacher Leader Master’s programs. The purpose of the course is to facilitate intensive self-reflection and self-evaluation, with direction from faculty, to determine strengths, weaknesses, and areas for study for each candidate within the program. In order to assure that each candidate’s needs are met, a series of assessment evaluation tools and supporting evidence will be used to determine the candidate’s level of proficiency at admission in each concomitant skill addressed in the program’s framework.</p>	<p><b>KTS 7: Reflection/Evaluation</b> <b>KTS 9: Professional Development</b></p>

**LEVEL 1 COURSEWORK**

Course Title: Teacher Leadership 1 (3 hours - required)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>Demonstrate an understanding of the importance of quality leadership in schools</li> <li>Discuss how Teacher Leaders perform a variety of roles to help influence student learning</li> <li>Discuss different theories about motivating faculty and students</li> <li>Work more effectively with other teachers to help them grow as instructors and contributors to the profession</li> <li>Demonstrate basic leadership skills (e.g., communication, conflict management, group processes, etc.) necessary to lead effectively in education environments</li> <li>Help facilitate others in organizational improvement processes (i.e., effective change efforts)</li> <li>Demonstrate the ability to work effectively with others both inside and outside the school</li> <li>Plan effective professional development for individuals and groups in school settings</li> <li>Use self-reflection as a vehicle for all improvement efforts, both personal and organizational</li> </ul>	<p><b><u>Introduction:</u></b></p> <ul style="list-style-type: none"> <li>Definitions, Contexts, and Impact</li> <li>Self-assessments of Teaching and Leadership</li> </ul> <p><b><u>Framework for Teacher Leadership*:</u></b></p> <ul style="list-style-type: none"> <li>The “Lens” of Student Learning</li> <li>Domains of School Culture</li> <li>Communications and Community Relations</li> <li>Teaching and Learning</li> <li>School-wide Policies/Programs</li> <li>Contexts of Teacher Leadership</li> <li>Teacher’s Department/Team</li> <li>Across the School</li> <li>Beyond the School</li> </ul> <p><b><u>Skills of Teacher Leadership:</u></b></p> <ul style="list-style-type: none"> <li>Interpersonal Effectiveness Motivating Others and Managing Conflict</li> <li>Group Processes and Teambuilding</li> <li>Problem Solving and Decision Making</li> <li>Facilitating Change and Dealing with Resistance</li> <li>School Culture and Professional Learning Communities</li> <li>Enhancing Student Learning through Collaboration with Others</li> <li>Effective Professional Development</li> </ul> <p><i>* Danielson, C. Course Title: Action Research Course Preparation Module (2 hours – required; may be taken in Level 1 or 2)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Explore the use of action research as part of a school improvement strategy</li> <li>• Analyze and explore current topics in education research</li> <li>• Integrate theoretical and experiential knowledge into instruction</li> <li>• Frame questions appropriate for classroom and school inquiry</li> <li>• Gain skills in selected qualitative and quantitative research methods</li> <li>• Enable students to develop, pursue, document, and report on an action research inquiry</li> <li>• Enable students to present their findings to a broader audience</li> </ul>	<p><b><u>Foundations to Action Research:</u></b></p> <ul style="list-style-type: none"> <li>• Definition and understanding of the tenets of action research</li> <li>• Exploring the various approaches to research</li> <li>• Understanding the similarities and differences between action research and other educational research</li> <li>• Exploring the historical and philosophical roots of action research</li> <li>• Exploring how action research is a part of a school improvement strategy</li> <li>• Review of current literature and development of a research question</li> <li>• Defining what makes a researchable issue</li> </ul> <p><b><u>Implementation Plan:</u></b></p> <ul style="list-style-type: none"> <li>• Research ethics</li> <li>• The IRB review process</li> <li>• The strategies, procedures, and tools for effective action research</li> <li>• Data and how they are used</li> <li>• Communicating the results of action research</li> <li>• The uses of reflection for educational practitioners</li> <li>• Determining how action research impacts teaching and learning regarding instructional effectiveness</li> </ul>	<p>A minimum of three Kentucky Teacher Standards must be addressed in the capstone Action Research Project to be completed by the conclusion of the degree program.</p>
Course Title: Curriculum Development (3 hours - individualized based on Entry Assessment)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>Professional Learning Community (PLC) participation required.</b></p> <p><b>At the conclusion of the course the K-12 Teacher will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Organize curriculum for horizontal and vertical alignment</li> <li>• Understand the elements of a standards-based unit</li> <li>• Incorporate state curriculum guidelines</li> <li>• Develop standards-based instructional unit incorporating Depth of Knowledge (DOK) and taxonomies</li> <li>• Develop, correlate, analyze, and provide appropriate assessment and feedback for individual unit</li> <li>• Integrate and sequence appropriate content knowledge into the unit</li> <li>• Develop an awareness of instructional quality</li> </ul>	<ul style="list-style-type: none"> <li>• Organizing curriculum for horizontal and vertical articulation through a holistic perspective and implementation utilizing contextual awareness, curriculum maps, and crosswalk documents</li> <li>• Understanding the elements of a standards-based unit that includes:                             <ul style="list-style-type: none"> <li>– Contextual factors and achievement data that affect classroom instruction</li> <li>– Understanding content in order to integrate and sequence a unit</li> <li>– Understanding tenets of instructional quality</li> <li>– Setting appropriate goals for students</li> <li>– Implementing goal aligned instruction</li> <li>– Evaluating student learning in light of goals and instruction</li> <li>– Reflecting on student learning and effectiveness of instructional design</li> <li>– Setting new high, appropriate, and worthwhile goals at the beginning of each curriculum sequence</li> <li>– Exploring state curriculum guidelines</li> <li>– Using the Depth of Knowledge (DOK) and taxonomies to develop units of study</li> <li>– Using assessment data appropriately to develop, correlate, and analyze learning and provide feedback for all stakeholders</li> </ul> </li> </ul>	<p><b>KTS 1: Applied Content Knowledge</b>  <b>KTS 2: Designs/Plans Instruction</b>  <b>KTS 3: Learning Climate</b>  <b>KTS 4: Implements/Manages Instruction</b>  <b>KTS 5: Assesses/Communicates Learning Results</b>  <b>KTS 6: Technology</b>  <b>KTS 7: Reflection/Evaluation</b></p>

Course Title: Classroom Instruction Module 1 – Instructional Strategies (1 hour - individualized based on Entry Assessment)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p>Professional Learning Community (PLC) participation required.</p> <p>At the conclusion of the course, the students will be able to . . .</p> <ul style="list-style-type: none"> <li>• Explore research-based best practices, analysis, and implication for use</li> <li>• Describe the theoretical basis for each best practice</li> <li>• Evaluate the influence of individual differences on of teaching and learning</li> <li>• Evaluate sample lessons that utilize research based best practices</li> <li>• Identify ways in which best practices can enhance the learning of diverse students</li> <li>• Demonstrate a working knowledge of the research-based best practices by developing lesson plans for these practices</li> <li>• Implement lesson plans using selected best practices in a classroom and evaluate the success of the implementation</li> <li>• Develop familiarity with resources of educational technology</li> <li>• Utilize technology to communicate knowledge, ideas, and information about the instructional strategies with other class members</li> </ul>	<p>Some topics included in the proposed curriculum include understanding how the brain learns; examining research-based instructional strategies; analyzing case studies and critiquing strategies modeled; and designing, revising, and implementing research-based strategies that meet the needs of all learners.</p> <p><b>How the Brain Learns:</b></p> <ul style="list-style-type: none"> <li>• Basic Brain Facts</li> <li>• How the Brain Processes Information</li> <li>• Memory, Retention, and Learning</li> <li>• The Power of Transfer</li> <li>• Brain Specialization and Learning</li> <li>• The Brain and the Arts</li> <li>• Thinking Skills and Learning</li> </ul> <p><b>Framework for Effective Instruction:</b></p> <ul style="list-style-type: none"> <li>• Teaching and Learning Context</li> <li>• Establishing and Communicating Learning Goals</li> <li>• Helping Students Effectively Interact With New Knowledge</li> <li>• Helping Students Practice and Deepen Understanding of New Knowledge</li> <li>• Helping Students Generate and Test Hypotheses About New Knowledge</li> <li>• Engaging Students</li> <li>• Developing Effective Lessons Organized into a Cohesive Unit</li> </ul> <p><b>Case Studies of Effective Instructional Strategies:</b></p> <ul style="list-style-type: none"> <li>• The Role of Technology in Effective Instruction</li> <li>• Collaboration With Parents, Peers, Others</li> <li>• Examination of Effective and Ineffective Instructional Strategies</li> </ul> <p><b>Designing a Unit Incorporating Research-Based Instructional Strategies:</b></p> <ul style="list-style-type: none"> <li>• Contextual Factors</li> <li>• Establishing Goals</li> <li>• Developing Effective Lessons That Incorporate Best Practice</li> <li>• Implementation of Unit</li> <li>• Analysis of Effectiveness of Unit</li> <li>• Reflection</li> </ul>	<p>KTS 1: Applied Content Knowledge</p> <p>KTS 2: Designs/Plan Instruction</p> <p><b>KTS 3: Learning Climate</b></p> <p><b>KTS 4: Implements/Manages Instruction</b></p> <p>KTS 5: Assesses/Communicates Learning Results</p> <p><b>KTS 6: Technology</b></p> <p><b>KTS 7: Reflection/Evaluation</b></p>

**Course Title: Classroom Instruction Module 2 – Equitable Schools  
(1 hour - individualized based on Entry Assessment)**

Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p>Professional Learning Community (PLC) participation required.</p> <p>At the conclusion of the course, the students will be able to . . .</p> <ul style="list-style-type: none"> <li>• Examine the role of school and stakeholder partnerships both at the school and district level in student achievement</li> <li>• Explore theory and research related to</li> </ul>	<p>Some topics included in the proposed curriculum include defining stakeholders and partnerships; analyzing case studies and real life school and stakeholder partnerships; and designing, revising, and implementing a school and stakeholder partnership design.</p> <p><b>Framework for School and Stakeholder Partnerships:</b></p>	<p>KTS 1: Applied Content Knowledge</p> <p>KTS 2: Designs/Plan Instruction</p> <p><b>KTS 3: Learning Climate</b></p> <p><b>KTS 4: Implements/Manages Instruction</b></p> <p>KTS 5: Assesses/Communicates Learning Results</p> <p><b>KTS 6: Technology</b></p> <p><b>KTS 7: Reflection/Evaluation</b></p>

<p>school and stakeholder partnerships</p> <ul style="list-style-type: none"> <li>• Evaluate sample partnership plans that utilize research-based best practices</li> <li>• Determine the components of successful school and stakeholder partnerships</li> <li>• Analyze research relating to culturally diverse populations, school and stakeholder partnerships, and increased student achievement</li> <li>• Identify ways in which school and stakeholder partnership can enhance the learning of diverse students</li> <li>• Develop familiarity with resources of educational technology</li> <li>• Develop methods in which technology will increase the likelihood of successful school and stakeholder partnerships</li> <li>• Utilize technology to communicate knowledge, ideas, and information about school and stakeholder partnerships with other class members</li> <li>• Create a school and stakeholder partnership plan for a selected school that is designed to enhance student success</li> <li>• Enlist the input of school leaders and stakeholders to develop, revise, and possibly implement a school and stakeholder partnership plan</li> </ul>	<ul style="list-style-type: none"> <li>• Definition of Stakeholders</li> <li>• Need and Purpose of School and Stakeholder Partnerships</li> <li>• Definition of Partnerships</li> <li>• Examine Research on School and Stakeholder Partnerships</li> <li>• Student Achievement and School and Stakeholder Partnerships</li> </ul> <p><b><u>Case Studies of School and Stakeholder Partnerships:</u></b></p> <ul style="list-style-type: none"> <li>• Parenting</li> <li>• Communicating and the Role of Technology</li> <li>• Volunteering</li> <li>• Learning at Home</li> <li>• Community Collaboration</li> <li>• Examination of Successful and Unsuccessful Partnerships</li> </ul> <p><b><u>Designing a Partnership:</u></b></p> <ul style="list-style-type: none"> <li>• Planning a Partnership</li> <li>• Enlisting Input of Stakeholders</li> <li>• Developing a Partnership Plan</li> <li>• Reviewing Partnership Plan</li> <li>• Implementing of Partnership Plan</li> </ul>

**Course Title: Classroom Instruction Module 3 – Classroom Management and Motivation  
(1 hour - individualized based on Entry Assessment)**

Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>Professional Learning Community (PLC) participation required.</b></p> <p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Discuss learning theories with application to classroom management in diverse classroom settings</li> <li>• Demonstrate an understanding of classroom management in context: elementary, middle, and high school settings for diverse student populations</li> <li>• Examine various ways to promote student motivation through productive classroom management, instruction, and assessment best practices</li> <li>• Analyze the classroom teacher role as a teacher leader in the areas of classroom management and student motivation</li> <li>• Utilize technology to support classroom management and student motivation initiatives to improve student achievement</li> </ul>	<p>Proposed topics include classroom management skills and processes and motivational strategies for diverse for diverse learners and at-risk students, involvement of parents and community members, use of technology, and data based decision-making.</p> <p><b><u>Proactive Classroom Management Efforts:</u></b></p> <ul style="list-style-type: none"> <li>• Establish Effective Rules and Procedures</li> <li>• Classroom Organization and Schedules</li> <li>• Curriculum Maps</li> <li>• Managing Administrative Tasks</li> <li>• Involvement of Parents and Community</li> <li>• Use of Technology and Proactive Classroom Management Efforts</li> </ul> <p><b><u>Student Behavior Management:</u></b></p> <ul style="list-style-type: none"> <li>• Conflict Prevention</li> <li>• Student Responsibility and Self-Management</li> <li>• Student Problem-Solving and Decision-Making Skills</li> <li>• Use of Technology and Student Behavior Management</li> </ul> <p><b><u>Positive Student Contributions to the Learning Environment:</u></b></p> <ul style="list-style-type: none"> <li>• Productive Student-Teacher Relationships</li> <li>• Role of Technology in Student Motivation</li> <li>• Intrinsic and Extrinsic Student Motivation Strategies</li> <li>• Use of Technology and Positive Student Contributions to the Learning Environment</li> </ul>	<p>KTS 1: Applied Content Knowledge KTS 2: Designs/Plan Instruction <b>KTS 3: Learning Climate</b> <b>KTS 4: Implements/Manages Instruction</b> KTS 5: Assesses/Communicates Learning Results <b>KTS 6: Technology</b> <b>KTS 7: Reflection/Evaluation</b></p>

Course Title: Classroom Assessment Module 1 – Analysis of Data to Improve Student Learning (2 hours - individualized based on Entry Assessment)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>Professional Learning Community (PLC) participation required.</b></p> <p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Explain the principles that guide educators in the process of selecting, developing, and using educationally meaningful assessments</li> <li>• Create assessments that align to the cognitive complexity and content articulated in state standards</li> <li>• Analyze the variety of assessments within a practitioner’s classroom</li> <li>• Craft a formative and summative assessment plan for a unit of instruction</li> </ul>	<p><b><u>Designing Effective Assessments:</u></b></p> <ul style="list-style-type: none"> <li>• Relation of assessment to instruction</li> <li>• Relation of assessment to the curriculum</li> <li>• Purpose and forms of classroom assessment</li> <li>• Process of planning a classroom assessment</li> <li>• Advantages and limitations of different item types</li> <li>• Strategies for constructing good test items</li> </ul> <p><b><u>Formative and Summative Assessment:</u></b></p> <ul style="list-style-type: none"> <li>• Application to instructional units</li> </ul>	<p>KTS 1: Applied Content Knowledge KTS 2: Designs/Plans Instruction KTS 3: Learning Climate KTS 4: : Implements/Manages Instruction <b>KTS 5: Assesses/Communicates Learning Results</b> KTS 6: Technology <b>KTS 7: Reflection/Evaluation</b></p>
Course Title: Classroom Assessment Module 2 – Evaluating Classroom Assessments (1 hour - individualized based on Entry Assessment)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>Professional Learning Community (PLC) participation required.</b></p> <p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Explain the eight forms of validity evidence and the three types of reliability evidence</li> <li>• Compute simple descriptive statistics for assessment data</li> <li>• Understand and apply the principles of level of measurement to calculations on classroom and school data</li> <li>• Articulate a philosophy for evaluating student progress</li> <li>• Understand professional/legal/ethical issues involved in the assessment of students</li> <li>• Utilize data from student results to improve classroom assessments</li> </ul>	<p><b><u>Validity:</u></b></p> <ul style="list-style-type: none"> <li>• Eight types of validity evidence</li> <li>• Reliability (three types) as one of the eight types of validity evidence</li> </ul> <p><b><u>Descriptive Statistics:</u></b></p> <ul style="list-style-type: none"> <li>• Simple calculations (mean, standard deviation, etc.)</li> <li>• Relation to inferential statistics</li> <li>• Levels of measurement</li> <li>• Statistical assumptions and violations</li> </ul> <p><b><u>Evaluating and Grading Student Progress</u></b></p> <p><b><u>Formative Assessment:</u></b></p> <ul style="list-style-type: none"> <li>• Using results to inform test improvement</li> <li>• Informal diagnostic instruments</li> </ul>	<p>KTS 1: Applied Content Knowledge KTS 2: Designs/Plans Instruction KTS 3: Learning Climate KTS 4: : Implements/Manages Instruction <b>KTS 5: Assesses/Communicates Learning Results</b> KTS 6: Technology <b>KTS 7: Reflection/Evaluation</b></p>
Course Title: Classroom Assessment Module 2 – Evaluating Classroom Assessments (1 hour - individualized based on Entry Assessment)		
Course Objectives	Content	KTS Met (BOLD = CP assesses KTS)
<p><b>Professional Learning Community (PLC) participation required.</b></p> <p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Explain the principles of psychometric analysis which underlie the construction of standardized assessment instruments</li> <li>• Distinguish between and interpret norm-referenced and criterion-referenced assessments</li> <li>• Analyze school and classroom data from standardized tests to inform school improvement efforts</li> </ul>	<p><b><u>Standardized Assessments :</u></b></p> <ul style="list-style-type: none"> <li>• Criterion- and norm-referenced tests</li> <li>• Principles of psychometric analysis</li> <li>• Interpretation of standardized tests</li> </ul> <p><b><u>Evidence-based School Improvement :</u></b></p> <ul style="list-style-type: none"> <li>• Disaggregation of data</li> <li>• Connecting data to school improvement</li> <li>• Utilizing school and classroom data</li> <li>• Utilizing teacher tests and standardized assessments</li> <li>• Improving Assessment Results</li> <li>• Strategies for test taking</li> <li>• Using results to inform test improvement</li> </ul>	<p>KTS 1: Applied Content Knowledge KTS 2: Designs/Plans Instruction KTS 3: Learning Climate KTS 4: : Implements/Manages Instruction <b>KTS 5: Assesses/Communicates Learning Results</b> KTS 6: Technology <b>KTS 7: Reflection/Evaluation</b></p>

<ul style="list-style-type: none"> <li>• Incorporate results from standardized assessments into a school improvement plan</li> <li>• Employ strategies that assist students in developing test taking skills</li> <li>• Utilize data from student results to improve classroom assessments</li> </ul>		
<b>Course Title: Content Specific Course (3 hours - individualized based on Entry Assessment)</b>		
<b>Course Objectives</b>	<b>Content</b>	<b>KTS Met (BOLD = CP assesses KTS)</b>
<p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Demonstrate acquisition and application of content knowledge in the candidate's specific content area</li> </ul>		KTS 1: Applied Content Knowledge

**LEVEL 2 COURSEWORK**

<b>Course Title: Varied (11-20 hours - required)</b>		
<b>Course Objectives</b>	<b>Content</b>	<b>KTS Met (BOLD = CP assesses KTS)</b>
Advanced Coursework in Leadership, Pedagogy, and Content; Areas of Specialization	BASED ON COURSE	N/A
<b>Course Title: Action Research Capstone Project</b>		
<b>Course Objectives</b>	<b>Content</b>	<b>KTS Met (BOLD = CP assesses KTS)</b>
<p><b>At the conclusion of the course, the students will be able to . . .</b></p> <ul style="list-style-type: none"> <li>• Demonstrate acquisition and application of content knowledge in the candidate's specific content area</li> </ul>	<p><b>SELECTION AND APPROVAL OF ACTION RESEARCH PROJECT:</b> Candidates will prepare a prospectus for an Action Research Project relevant to the candidate's work environment that addresses the questions:</p> <ol style="list-style-type: none"> <li>1. What is already known about the subject?</li> <li>2. Why is candidate interested?</li> <li>3. What information is available regarding the topic?</li> <li>4. How will the project impact the work environment?</li> <li>5. Are there other ways to describe the topic (synonyms and relationships)? What kinds of resources would be useful for the project?</li> <li>6. What resources would be useful/needed for the project?</li> <li>7. Who will be participating (collaborators and subjects)?</li> </ol>	Various: The project must address a minimum of three KTS in depth.
